

FAUNA LABORATORIES, LTD.

LIST OF ARACHNID VENOMS

Contents: this document is a register of arachnid (spider and scorpion) venoms, available in the stock of Fauna laboratories, Ltd., at the date of publishing.

Venoms of snakes and insects are not included. Please, feel free to request appropriate information.

All prices are indicated in the US Dollars per microliter of native venom, used for freeze-drying. It is possible to estimate weight of dried samples, taking into consideration, that weight of dry compounds, after removing water is approximately 20% of the weight of native venom (5ul of freeze dried venoms have weight of approximately 1mg).

Species, indicated as “sp.” are in the process of taxonomical identification; some of them are probably new un-described species or ones, which are in description process.

By default all venoms are produced from adult females and subadult specimens. Venoms of adult males are produced separately and marked accordingly.

Please, check availability and pricing with our sales manager.

All prices are subject to change without a prior notification.

All venoms are being sold for scientific purposes. We are not selling venoms for medical and veterinary needs, as well, as to individuals.

Shipping and handling expenses are not included in prices and are being paid by customers.

Please, feel free to check details regarding shipping, handling and limited warranty:
